He loved the Virginia countryside all his life. No matter where he travelled, he always longed to return to Virginia. His father owned a tobacco plantation. This vast farm stretched across more than a thousand acres on the edge of wilderness, just east of the Blue Ridge Mountains.

He spent five years studying law, for which he had a high regard. He thought learning about the law helped one understand the culture, history, and morality of a nation. Several years after having received his law degree, he laid the first bricks of his own home. He called his estate an Italian word that means "little mountain".

He was a member of the Virginia House of Burgesses, the legislature for the Virginia Colony, from 1669 to 1774. During this time, the colonies were growing more and more resentful of the British. Great Britain had been involved in expensive wars against France in both Europe and North America. The British Government needed money to pay for its military. Britain began increasing taxes on the colonists to raise money. They put taxes on items ranging from sugar to tea and newspapers. The colonies were outraged. They had no representatives in Parliament, the British legislature. The cry went up: "Taxation without representation is tyranny!"

By 1776, the 13 American colonies were at war against Great Britain. He, who was just 33 years old, was among the members of the Continental Congress that travelled to Philadelphia to meet the delegates from other colonies.

Congress named him to a committee charged with writing an important document. It would tell the world that Americans no longer accepted Great Britain's rule. It would declare America's autonomy. Other committee members recognized his talent as a writer, and they asked him to create the document.

His ideas helped build what the United States strives to be – a democracy where the people participate in their government.

1. Come up with the word that means "regard" in this sentence: "He spent five years studying law, for which he had a high regard"?
Your answer:
2. Which situation resulted from the following event: "Britain began increasing taxes on the colonists
to raise money. They put taxes on items ranging from sugar to tea and newspapers"?
Your answer:
3. Which word from the text originated from the Greek word meaning "oppressive absolute power of
a leader"?
Your answer:
4. Which document is described in the penultimate paragraph?
Your answer:
5. Which famous American politician is described in this text?
