Fill in the blanks in the following passage. Use one word only for each blank.

According to recent research, there 's simply

such thing

random love. 'Nature has wired us for one special person,' insists Sam Smith, a psychologist in London, UK. Apparently we all carry

unalterable, subliminal guide to our perfect partner

our subconscious. When all the elements click into place, we fall in love. And, even

we don't find a perfect match, our brain circuitry will hunt for the next best thing - we

not hooked, unless enough of the right bells ring. From early childhood we gather information about the world and the people around us, slowly developing a map

our preferences. Max Brown of the University of Liverpool in the UK has coined the phrase 'love map'

describe the process. The love map gets

tentacles round you at an early age. Our subconscious love template works overtime in the search

the perfect match.
